Ganga Hospital Founder's Oration

In 1978, the foundation of Ganga Hospital was laid by a couple with the intention of establishing a hospital that would provide every patient the best treatment at affordable cost. The journey was never easy but their relentless spirit, determination and hard work made their dream come true. They preached integrity, ethics, professional and family values by example, which brought in trust and confidence to the team and to the patients.

Today, Ganga Hospital stands tall amongst medical institutions for its professional and academic excellence. It has placed Coimbatore in the World Map of Orthopaedics and Plastic and Microsurgery by excellence in clinical work, academics and research.

All made possible because of their Dream... To celebrate this journey of our Founders who inspired and set an example for us, we instituted the Founder's Oration in 2013.

Every year, an eminent person who stands as high example of success achieved through hard work, honesty, ingenuity, social commitment and passion in what they do will deliver the Oration. We are sure that their presence and words will inspire people to dream and create institutions of excellence for the benefit of our society.
